QUICKSEAL XLP

Product Guide

Advantages

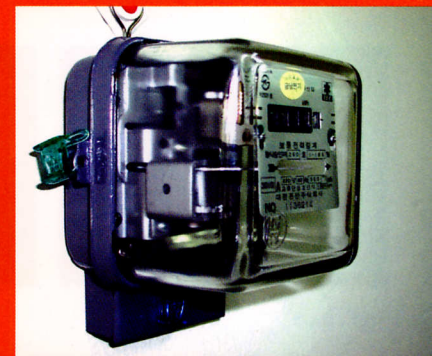

Ease of Use: The QUICK SEAL XLP has a patented ergonomic design that enables the user to close the seal quickly and easily.
NO TOOLS REQUIRED.

Security: The QUICKSEAL XLP has been tested by the Los Alamos National Laboratory and is recommended (from among 150 seals tested) for use by the United States Department of Defense and Department of Energy.

Muriatic Acid Attack: The QUICKSEAL XLP is designed to withstand the most aggressive attacks on security seals including muriatic acid and other methods.

Versatility: The QUICKSEAL XLP is designed to fit a majority of applications throughout most industries.

Manufacturing: All NIC Products Inc. seals are manufactured under ISO 9002 qualified production facilities.
